# SOLAR LIGHTINGS

The use of solar lamps has become increasingly popular as more people become aware of the environmental impacts of the climate crisis and seek to reduce their carbon footprints. Solar lamps provide many advantages as they are easy to install, energy-saving, environmentally friendly, and long-lasting. They are suitable for use in most areas as they are designed to withstand extreme temperatures or heavy rains.

# SOLAR LIGHTINGS

EWL GEKTOR

EWL GEKTOR

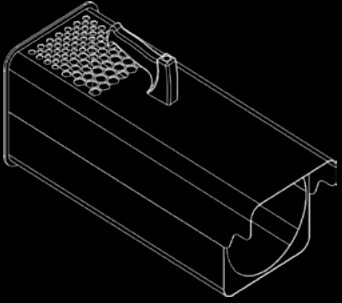

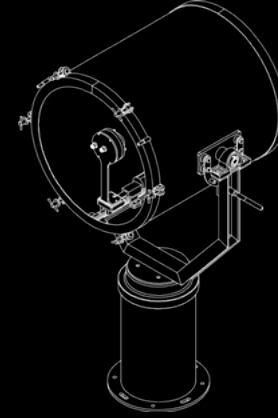

An aerial photograph of a water tower in a rural landscape at night. The tower is illuminated from below, and two powerful spotlights are directed from its top towards a road that crosses the tower's base. The surrounding fields are dark, and the road is lit by the spotlights and some ambient light. A small car is visible on the road in the distance.

# MILITARY LIGHTINGS

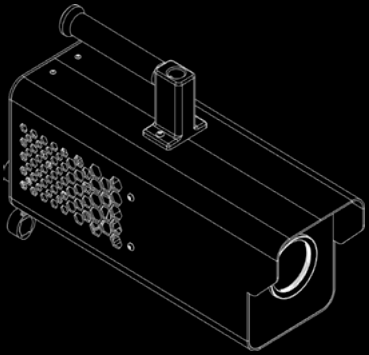

Military lighting is designed to operate smoothly in harsh operating conditions and emergencies such as impact, dust, humidity, vibration or extreme temperature differences. Military lighting group has easy installation features. In this way, they can be quickly installed and made ready for use.
